

Hans Schnedlitz

Senior Ruby on Rails Engineer

About

I'm a Ruby on Rails Engineer specialized in operations and infrastructure. I have years of experience tuning performance, creating high-performing APIs and establishing continuous delivery pipelines.

On the side, I'm the organizer of [Vienna.rb Ruby Meetup](#), do technical writing for [AppSignal](#) and am active in Open Source ([Rails Mini Profiler](#), [GraphQL Groups](#), and [more](#)).

Experience

Self-employed, 2024 - Present

Performance optimization & infrastructure migrations for various customers in the DACH region.

Meister, 2018 - 2023

Tech Lead for MeisterTask team. Lead migration to Kubernetes. Introduced Observability and OpenTelemetry. Heavy focus on APIs (GraphQL, REST), performance and infrastructure

Splendit IT-Consulting, 2017-2018

Developed Eclipse plugin for automated code refactoring. Streamlined internal processes & continuous integration using Docker & Jenkins.

Tricentis, 2013-2015)

Developed extensions for test automation in Java, C#, Delphi. Maintained WebsphereMQ and ActiveMQ integrations.

Skills

Backend

Ruby on Rails, MySQL, PostgreSQL, GraphQL, REST, Sidekiq

Infrastructure

Docker, OpenTelemetry, Kubernetes, Helm
